

# How To: Reinstalling Windows 10 from USB Drive

In the event that the PC running your HootBooth® Photo Booth is unable to start Windows 10 and Startup Repair does not correct the issue, you will need to reinstall Windows 10. While this feature is generally built into the PC, the cause of the Windows failure may prevent you from accessing it. If this is the case, you may follow the steps below.

You will need the following:

- A clean USB Flash drive, 4gb or larger.
- A working PC running Windows (NOT your HootBooth® Photo Booth)
- USB keyboard and mouse

## Part A

### **The following step are to be run on a separate PC**

1. On your separate PC, open your browser and go to the link below, or open this instructional in the PC and click the link below to bring you to the Windows10 download page:

<https://www.microsoft.com/en-us/software-download/windows10>

2. Click 'Download tool now' as shown in photo below:

## Looking to install Windows 10 on your PC?

To get started, you will first need to have a license to install Windows 10. You can then download and run the media creation tool. For more information on how to use the tool, see the instructions below.

Download tool now

[Privacy](#)

3. You will see 'MediaCreationTool.exe' show up in the downloads bar. Click 'Keep' to proceed with download.

4. Once download has finished, open executable file.

5. Insert flash drive into PC. All items should be cleared from flash drive (save contents to your desktop if you wish to keep them).

6. When prompted, Accept terms

7. Select 'Create installation media for another PC', click next

8. Click 'next' on 'Select language, architecture and edition' screen

9. Select 'USB flash drive', click next

# How To: Reinstalling Windows 10 from USB Drive

10. Ensure the USB drive you wish to load the Windows image on is selected, click next

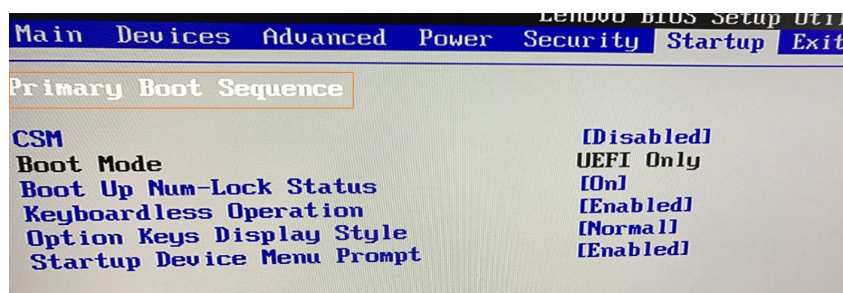

11. The Windows image will now begin loading onto the USB drive. This can take some time, see the percent complete icon. A message will appear when it is complete. You may now eject the drive from Windows and safely remove from the PC.

## Part B

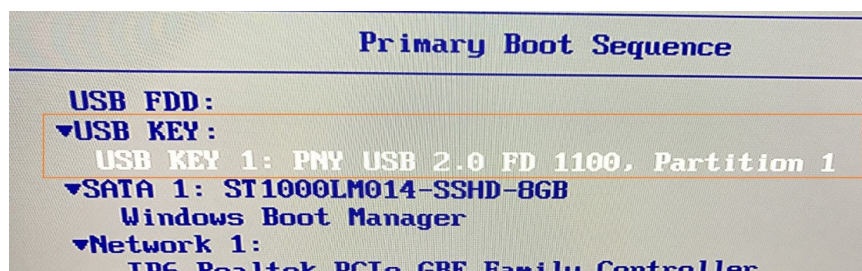

### The following step are to be run on your HootBooth® Photo Booth

1. Insert USB stick imaged above into an open USB port your HootBooth® Photo Booth
2. Connect USB mouse and keyboard into open USB port on your HootBooth® Photo Booth
3. Power on PC inside your HootBooth® Photo Booth
4. The PC should automatically boot from the USB Stick. If it does not, verify the following:

Press F1 continuously immediately after powering on PC until BIOS loads. Right cursor to 'Startup' tab

Press enter on 'Primary Boot Sequence'. Use + or - keys on keyboard to set USB to be first boot device. Press F10 to save and exit.

5. When the PC boots you will see the following screen:  
Click 'Install now'

6. The next screen is shown below:  
Select your language and click 'next'

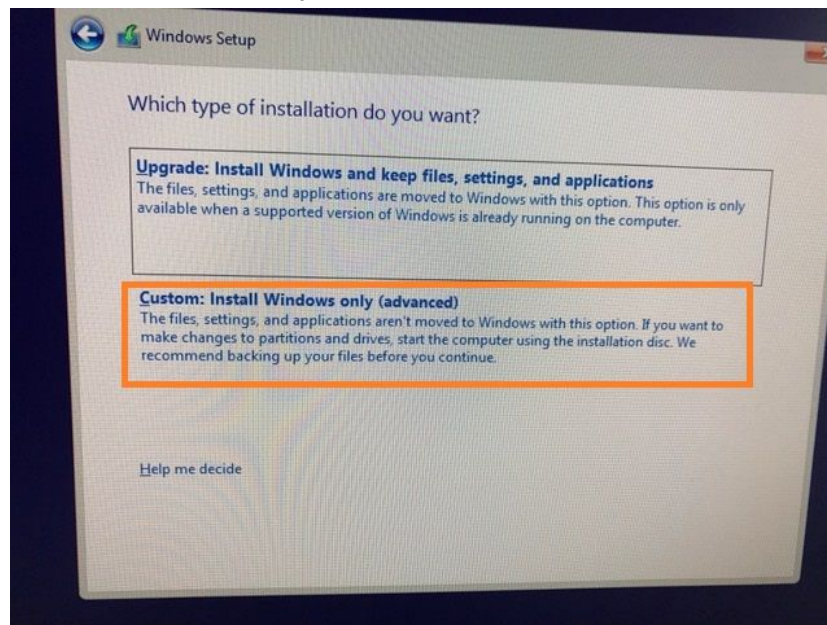

# How To: Reinstalling Windows 10 from USB Drive

7. Now Accept the terms as shown below, click 'next'

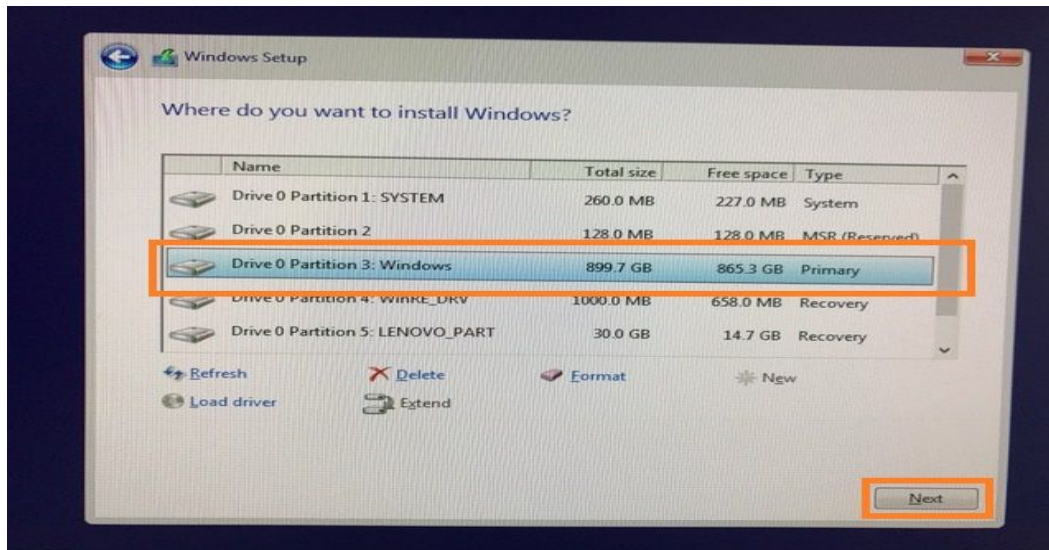

8. Select 'Custom: Install Windows only' as shown below

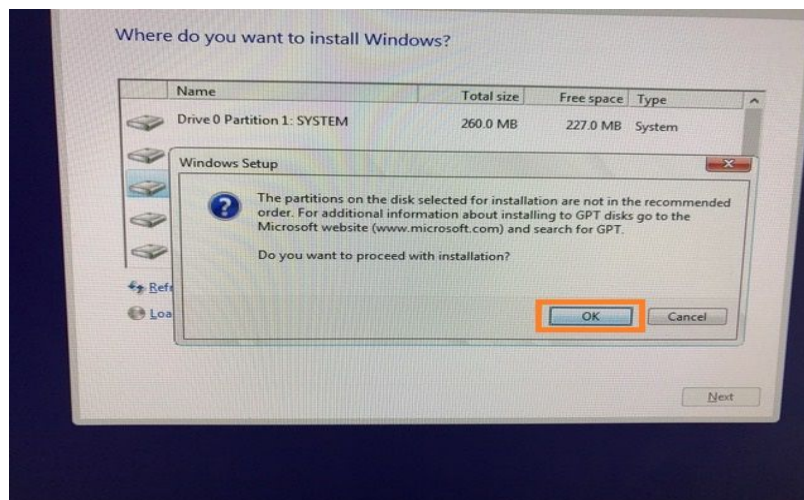

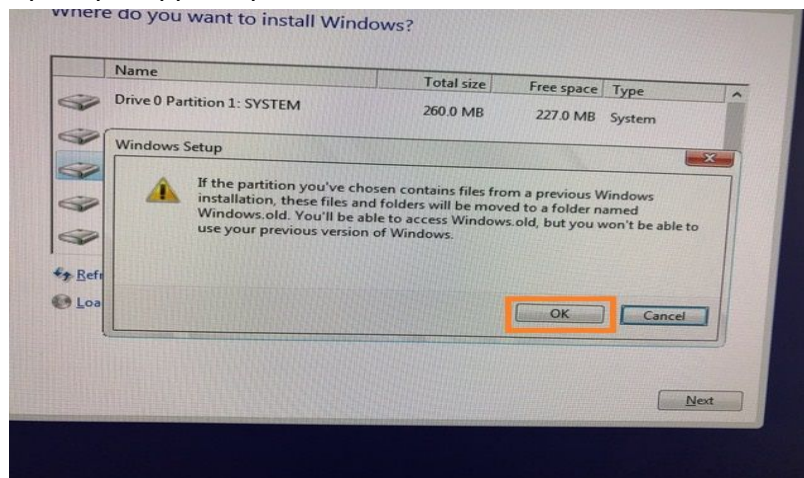

# How To: Reinstalling Windows 10 from USB Drive

9. Select the '**Windows**' Primary partition as shown below, click 'next'

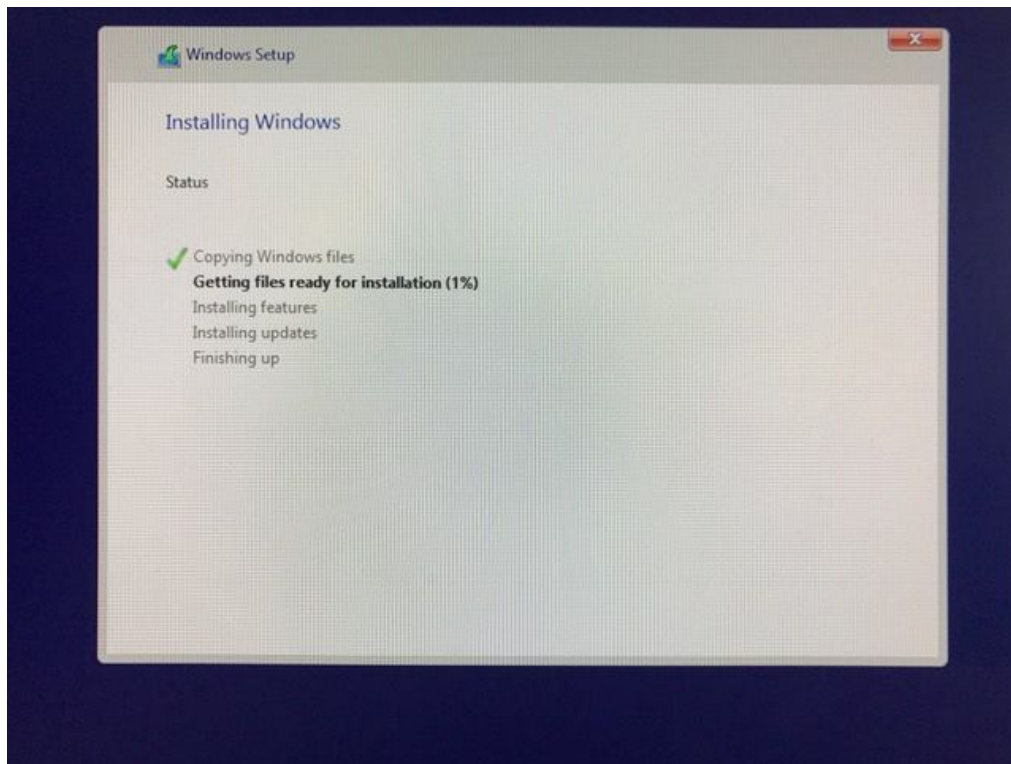

10. If the next two prompts appear, press 'OK' on both

## How To: Reinstalling Windows 10 from USB Drive

11. Now Windows will begin to reinstall with percentile progress shown, as seen below:

12. Monitor the progress of the installation. After 'Finishing up' is complete the unit will restart. **Allow it to finish, but remove the USB drive when the PC reboots.**

13. When the PC start, you will see the screen below:

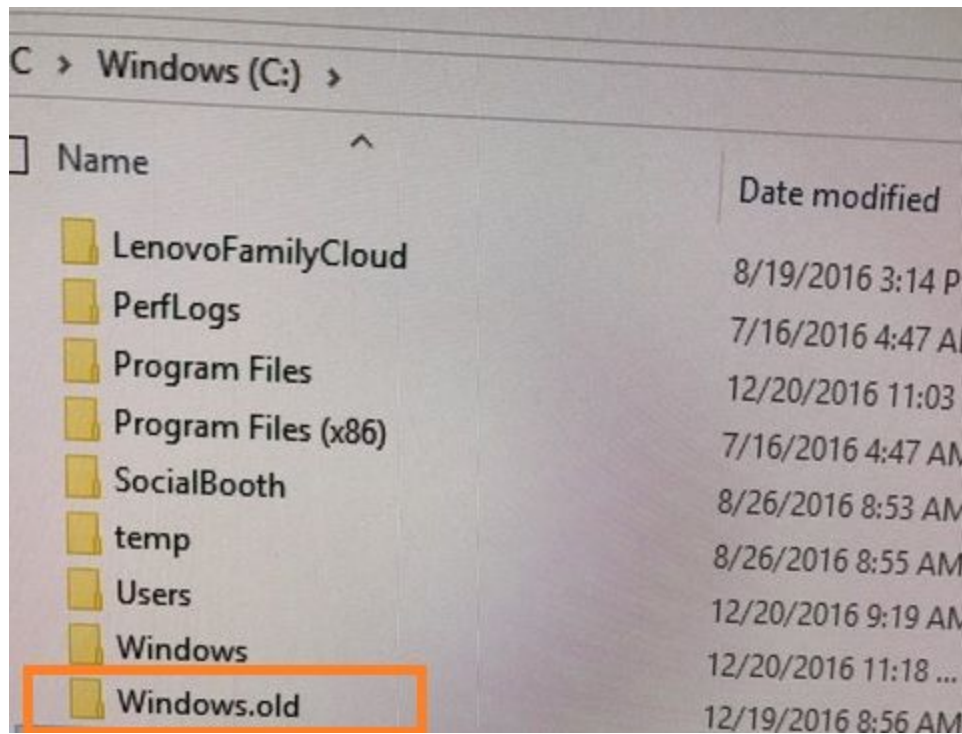

Window is now setting up the fresh install

14. Windows will show various messages and take you through an initial setup, where you will enter your wifi password, set up your User Profile name/password, and ask which settings you want (select 'express').

## How To: Reinstalling Windows 10 from USB Drive

15. Once logged into Windows, you will find your previous documents in a folder titled 'Windows.old' as shown below. You can move these where you want them.

16. At this point your re-install is complete. You will need to download and install the following:
- SocialBooth or SparkBooth DSLR (refer to HootBooth order email or ask HootBooth if you need your license info)
  - TeamViewer 12 (select 'personal use' when prompted)
  - Sinfonia CS2 Drivers
